

# Table of contents

## Materials I

*Dong Wei Fan, Han Soo Kim and Bruno C. De Cooman*

**Physical metallurgy of hot press forming coating degradation suppression .....7**

*Nak-Hyun Kim, Ki-Young Kwon and Chung-Gil Kang*

**The effect of cooling rate on mechanical properties  
in hot press forming of Al-Si coated 22MnB5 sheet  
and its theoretical temperature prediction.....17**

*Kurt Steinhoff, Nicolas Saba, Manuel Maikranz-Valentin and Ursula Weidig*

**Optimized processes and products in hot sheet metal forming .....29**

## Modelling & Simulation I

*Tobias Olsson*

**An LS-DYNA material model for simulations of hot stamping processes  
of ultra high strength steels .....43**

*Laurent Durrenberger, Joël Wilsius and Philipp Hein*

**Impact of the constitutive model on the hot-forming  
numerical predictions of Usibor1500P .....51**

*Iñigo Aranguren, Maite Santos, Sonia Varela,*

*Beatriz González, Marian Gutiérrez and Borja Fernández*

**Evaluation and optimization of the use of simulation software codes  
for the design of a tooling for a hot stamped industrial part.....59**

*Thomas Schönbach and Michael Kerausch*

**Effective usage of simulation techniques  
for the layout of hotforming processes.....69**

## Materials II

*Hans-Gerd Lambers, Sergej Tschumak, Hans Jürgen Maier and Demircan Canadinc*

**Tensile properties of 51 CrV 4 steel in  
martensitic, bainitic and austenitic state .....77**

<i>Hermann Autenrieth, Norman Herzig, Jürgen Hoffmeister, Volker Schulze and Lothar W. Meyer</i>	
<b>Influence of loading state on ductile failure behaviour of AISI 1045 in a normalized state and numerical description and application .....</b>	<b>87</b>
<i>Kazuhisa Kusumi, Shuji Yamamoto, Tetsuro Takeshita and Masayuki Abe</i>	
<b>The effect of martensitic transformation on the spring-back behaviour of the hot stamping .....</b>	<b>97</b>
<i>Alexander Bardelcik, Mary Wells and Michael Worswick</i>	
<b>The effect of cooling rate on the mechanical properties and energy absorption potential of hardened boron steel .....</b>	<b>105</b>
<i>Ingrid Picas, Ricardo Hernández, Daniel Casellas and Isaac Valls</i>	
<b>Cold cutting of microstructurally tailored hot formed components .....</b>	<b>115</b>
<i>Thorsten Labudde and Wolfgang Bleck</i>	
<b>Formability characterisation of press hardened steels .....</b>	<b>127</b>
<b>Process Design I</b>	
<i>Hyunwoo So, Hartmut Hoffmann and Rolland Golle</i>	
<b>Blanking of press hardened ultra high strength steel .....</b>	<b>137</b>
<i>Stéphane Graff and Franz-Josef Lenze</i>	
<b>Monitoring the hot stamping process: From hot stamping- to crash-simulations .....</b>	<b>147</b>
<i>Hossein Karbasian, Alexander Brosius and A. Erman Tekkaya</i>	
<b>Influence of process control on geometrical and mechanical properties of hot stamped parts .....</b>	<b>157</b>
<i>Ignacio García Acha, Borja Fernández, Agustín Sanz, Iñigo Aranguren, Beatriz González and Sonia Varela</i>	
<b>Die Development from the part concept to the production line .....</b>	<b>167</b>
<i>Ralf Kolleck, Jens Aspacher and Robert Veit</i>	
<b>Efficiency of hot forming processes .....</b>	<b>173</b>

## Process Design II

<i>Reimund Neugebauer, Angela Göschel, Andreas Sterzing and Frank Schieck</i> <b>Gas forming with integrated heat treatment for high performance steel - a solution approach for press hardened tubes and profiles</b> .....	181
<i>Ryan George, Alexander Bardelcik and Michael Worswick</i> <b>Development of a hot forming die to produce parts with tailored mechanical properties – Numerical study</b> .....	189
<i>Kent Eriksson and Mats Lindman</i> <b>Press hardening - opportunity or limitation?</b> .....	299
<i>Marc Decker and Hubertus Valpertz</i> <b>Hot forming trends – New technologies for existing systems</b> .....	205
<i>Franz-Josef Lenze, Sascha Sikora, Dirk Sauer and Oliver Straube</i> <b>Materials and process developments on the field of hot stamping technology</b> .....	211
<i>Takehide Senuma, Hideaki Magome, Akihiro Tanabe and Yoshito Takemoto</i> <b>New hot stamping technology characterized by its high productivity</b> .....	221

## Modelling & Simulation II

<i>Hans-Åke Häggblad, Daniel Berglund, Karl-Gustaf Sundin and Mats Oldenburg</i> <b>Formulation of a finite element model for localisation and crack initiation in components of ultra high strength steels</b> .....	229
<i>Per Salomonsson and Mats Oldenburg</i> <b>Investigation of heat transfer in the press hardening process</b> .....	239
<i>Göran Lindkvist, Hans-Åke Häggblad and Mats Oldenburg</i> <b>Thermo-mechanical simulation of high temperature formblowing and hardening</b> .....	247
<i>Lionel Morangay, Gonzalo de los Rios, Said Mamouri, Erwan Beauchesne and Subir Roy</i> <b>Recent advances in hot sheet metal forming simulation using RADIOSS® explicit finite element code</b> .....	255

**Products**

<i>Stefan Goedicke, Stefan Sepeur, Christine Breyer, Maria Köyer and Jörg Lewandowski</i> <b>Development of an anti scaling coating with active corrosion protection for hot sheet metal forming</b> .....	265
<i>Thomas Stoehr, Juergen Lechler and Marion Merklein</i> <b>Investigations on different strategies for influencing the microstructural properties with respect to partial hot stamping</b> .....	273
<i>Josef Faderl, Siegfried Kolnberger, Thomas Kurz, Gerald Luckeneder, Thomas Manzenreiter and Martin Rosner</i> <b>phs-ultraform® – Continuous galvanizing meets press-hardening</b> .....	283
<i>Daniel Berglund</i> <b>Hot Stamped components with tailored properties – Simulation and validation of Product Performance</b> .....	293
<i>Lars Sandberg, Stefan Hortlund and Göran Berglund</i> <b>Formblowing and Hardening of an A-pillar</b> .....	303
<i>Michael Braun and Christian Fritzsche</i> <b>Joining of hot-formed steel</b> .....	313

**Materials III**

<i>Rolf Schwartz and Harald Lehmann</i> <b>Developments in the field of heat treatment systems for hot-form hardening lines</b> .....	323
<i>Isaac Valls, Begoña Casas and Noemí Rodríguez</i> <b>Improving die durability in Hot Stamping and Hard Cutting</b> .....	331
<i>Esa Vuorinen, Lin Wang, Sanja Stanojevic and Braham Prakash</i> <b>Influence of retained austenite on rolling-sliding wear resistance of austempered silicon alloyed steel</b> .....	339
<i>Jens Hardell and Braham Prakash</i> <b>Tribological properties of PVD coated and plasma nitrided hot forming tool steel during sliding against UHSS at elevated temperature</b> .....	349
